DETAILED ACTION

Drawings

The corrected or substitute drawings were received on 5/6/2003. These drawings are acknowledged.

Double Patenting

A terminal disclaimer with regard to U.S. Patent No. **5,895,406** and U.S. Patent No. **6,162,243** is expected in response to this "Office Action".

Claim Objections

Claim 22 is objected to because of the following informalities: the recitation "at a plurality of locations along said strut, wherein said strut is connected to an adjacent strut by a separate link" (line 7-8) does not clearly indicate if there are many links for each strut and "said strut" (line 7) lacks positive antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3731

2. Claims 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by SIMON et al. (5,354,308).

As to claim 21, SIMON (Fig. 1-5) shows stent 14. Stent 14 comprises wire 4 defining longitudinal wave struts with links 6 for maintaining the struts in a tubular structure. The frequency of the struts at the two ends of the stent is greater than the frequency of the struts in the intermediate section of the stent (Fig. 4).

As to claim 22, SIMON (Fig. 5) shows stent 14 having links/6 axially displaced in the manner as recited in the claim.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
